

Comments

Suggest: different colour text, click flag to begin

Scroll now = easy to use, padlock on shield, enable unsafe scripts,

Overall: - Well done

likes the hovering icons

user testing - mobile

confirmation page \Rightarrow loads well on non 4G phone,
probs mobile really heavy, JS data loads well
on mobile

User Test Notes

user was able to locate first menu item. user figured out Subscribe fly icon button. That it was transaction?

able to use navigation correctly, can navigate JSch Data properly.

able to use hover icons on localhost, says animations are too small, had to highlight text to see it, change colour where needed.

user is reading warning for unsafe scripts, ~~user~~ tried to fix problem but failed, user needed prompt from me to fix unsafe scripts

user needed prompt to find lost recn
